

## Free ATM's Make Big Money...

Increased ATM uptime, fewer service calls, and an illuminated, high visibility topper result in more transactions and lower operational costs. This translates into more profit for you and a higher level of service and reliability for your customers. With four dispenser options ranging in capacity from 1K to 4K, ATM configurations can be customized to match cash volume needs.

---

## More Secure

The solid design of the Mini-Bank 1500, including a 1/4" steel bottom and a weight of 269 lbs., provides a greater level of stability and security, surpassing other competing ATMs in this class. This, combined with a UL 291 business hour listed safe, reduces overall theft risk and ensures that the ATM is not easily compromised.

---

## Cost-Free Compliance

The Mini-Bank 1500 is Triple DES compliant and a Visa certified Encrypting PIN Pad (EPP) will be standard, guaranteeing the highest level of security. It also comes with a voice guidance system to meet ADA (Americans with Disabilities Act) requirements, eliminating the need for additional hardware upgrades in the future.

- Wired or wireless communication
- Manual or electronic lock
- ATM Topper

## **Triton 8100 Dimensions & Specs**

- 405 mm wide (16")
- 330 mm deep (13")
- 1245 mm high (49"), without topper
- 1524 mm wide (16"), with topper
- 41 kg (90 lbs)
- Power consumption 2.0A @ 115 VAC for ATM owners to maintain, at one of the most cost-competitive prices to date. The 8100 features Triton's own TDM-50 cash dispensing mechanism, which requires the least amount of steps to reload with bills. With the TDM-50 comes a top loading single cassette which slides in and out. This design requires less time for the merchant to reload the dispenser with it is from Triton, you can rely on the 8100 to deliver Triton's reliability and with state-of-the art electronics and a key-lock mechanism, which is most suitable for tended locations. The 8100 features all of the mandated security features including a VISA 100 meet all ADA requirements.

## Triton 9100

The mid 90's, Triton took the ATM industry by storm with the release of its 9500 model ATM. It was the first low-end, off premise ATM the marketplace had seen and it quickly became an icon.

History repeats itself with Triton's new 9100 series ATM. Designed from the ground up to be dollar-for-dollar, the lowest cost ATM in the industry; it features Triton's unparalleled reliability.

It also features Triton's own TDM-100 dispensing mechanism, incorporating state-of-the-art electronics and a host of features like locking cassette and automatic error recovery designed to maximize uptime.

And even though the 9100 features the lowest cost of ownership in the industry, it still incorporates many of the industry's tightest security features, such as Encrypting Pin Pad (EPP) and Triple DES, the new standard for PIN encryption.

Triton's 9100 is simply the best low cost ATM in the industry, bar none.
