

THE VERIFONE SOLUTION

Tip Prompting. A prompt for the tip amount can be added to the sales transactions.

This ensures the salon qualifies for the best discount rate since the authorization amount and settled amount must be the same.

Receipt Options. Merchant messages (i.e. "\$5 off next manicure") can be added to receipt footers to promote repeat business.

Debit Support. Merchants can offer ATM card transactions to consumers and save with lower transaction fees.

Check Processing Options. To reduce bounced check fees, checks can be authorized using check service providers via split dial or through the primary processor.

Check Conversion. The cost of check deposits and bounced checks can be reduced by converting checks to electronic transactions.

Detail Report. This report simplifies accounting by showing detail for each transaction in the batch by employee, including employee ID, partial account number, amount, and tip amount.

Batch Totals Review. Batch totals can be reviewed on the terminal display for a quick snapshot of the day's business.

PIN Support. Consumer PIN entry is supported for debit transactions on the Omni 3200SE or via an external PINpad.

VERIFONE'S OMNI
3200SE TERMINAL WITH
SOFTPAY SOFTWARE IS
THE IDEAL PAYMENT
SOLUTION FOR BEAUTY
SALONS AND SPAS.

Omni 3 00SE

Sleek, compact design. The Omni 3200SE fits nicely into the counter area. Only one power cord is required, eliminating the need to string multiple cables and connectors under the counter.

Simple check authorization support. CR 600 MICR check reader or CR1000i check imaging device integrates with the Omni 3200SE terminal.

Easy user interface. A familiar ATM-style user interface reduces employee entry errors for faster and easier transactions.

Quiet, fast printing. High-speed thermal printing reduces noise and speeds transaction time. A "clam shell" printer facilitates drop-in loading virtually eliminating paper jams.
